JT 10700 & LF 10700 Wrapping Films

Not magic, but it sure looks like it

Car wrapping has never been easier! 3D ultra-conformability, excellent printability and proper tack levels mean that Mactac JT 10700 wrapping films give you truly amazing application results. Options have expanded further with the release of the new XR grade for Extreme Repositionability allowing easier and faster application than ever before.

This series of films is now a winning choice for many of your most demanding jobs. Ever-popular JT 10700 WG-BFG uses Mactac Bubble-free patented adhesive technology for quick and easy application. Speeding things up even more is the new JT 10700 WG-BFG-XR, this film features a perfectly balanced initial tack adhesive for extreme repositionability and fast, stunning results on even the deepest corrugations. The new material also gives you an outstandingly smooth finish, for a stop-and-look gloss, paint-like effect. The ultimate wrapper experience!

Mactac LF 10700 matt and gloss overlaminates complete the picture, and UV adhesive technology suits UV-curable inks as well as Solvent, Eco-Solvent and Latex inks.

JT 10700 & LF 10700 Wrapping Films

Advantages

- Extreme repositionability of JT 10700 WG-BFG-XR, incredibly fast application
- Ultra-smooth finish with JT 10700 WG-BFG-XR
- Extreme conformability on 3D surfaces and corrugations
- Excellent printability on all main platforms
- Durable over time
- Mactac repositionable adhesives for different levels of soft initial tack - easy handling
- Fast and efficient bubble-free application
- High opacity, thanks to grey adhesive
- ICC profiles available for optimal printing.
- Fire rating EN 13501-1

Applications

JT and LF 10700 Series films are an excellent choice for long-term promotional applications on demanding 3D surfaces. Extreme conformability and reliable performance over time make these products especially suitable for partial or total wrapping of vehicles and corrugated surfaces.
