An unrivalled range of films for one-way vision applications

Every window and every project is unique, that's why we have a range of films that perfectly suits every application.

Long Term or Short Term?

Whether you are looking for a product suitable for 6 months or one that lasts over 36 months our expansive product range offers solutions for both.

Inside or Outside Application?

See-through graphics don't always have to be applied to the outside of a window. Internally applied graphics are ideal for applications where access to the outside is restricted.

Image Impact or Through-Vision?

A range of films from low transparency (20%) for vibrant image impact and maximum privacy, to high transparency (50%) to maximise through-vision and daylight inside

...and if it's both you're after, then our **Exclusive HD film** is the one for you – another world first from Contra Vision.

Our wide range of transparencies

Project Lifetime Value

Contra Vision products deliver real value across the entire project lifetime and can save customers up to 25% on overall project costs.

Create

Achieve your vision

The world's widest range of perforated window film, providing unlimited design options suitable for every application.

Print

Right first time

Spectacular results across a wide range of print technologies and Contra Vision® Grayliner™ ensures colours are right first time.

Install

Trouble-Free

The simplest installation process, suitable for both inside and outside situations in both high and low temperatures.

On window

Peace of mind

Outstanding adhesion technology you can rely on, ensuring great looking results for the entire duration of the project.

Remove

Quick and clean

Excellent removal qualities means minimal tearing, without the adhesive residue you can get from other films.
