ARLON COLOUR PROTECTION FILM

Arlon's Colour Protection Film is a Thermoplastic Polyurethane (TPU) film that delivers the vibrant aesthetics of a color change wrap with the superior protection of a Paint Protection Film (PPF).

Engineered with a proprietary dry-apply adhesive system, it ensures a clean, bubble-free installation, allowing professional vinyl wrap installers to easily apply the high-level protection film using their existing skills.

This film provides a true paint-like finish, exceptional durability, and self-healing properties, all backed by a 5-year warranty.

DRY-APPLY TECHNOLOGY:

Proprietary adhesive system allows for dry installation, significantly reducing labor time and cost, and ensuring a clean, bubble-free finish.

DUAL-PURPOSE FILM:

Combines vibrant color change with superior paint protection, offering a high-value service to customers.

SELF-HEALING PROTECTION:

Advanced TPU/PU topcoat automatically repairs minor scratches and scuffs with heat, maintaining a flawless finish.

ULTRA HIGH GLOSS:

Delivers a true paint-like finish that exceeds many conventional vinyl wraps.

5-YEAR WARRANTY:

Confidence in long-term performance, colour vibrancy, and protection.
